

Omar Rasheed

Python Automation & Backend Developer | AI Integrations | Databases | ETL | Web Scraping

Email: Pythondev958@gmail.com | Phone / WhatsApp: +92-333-786-5857 | GitHub: github.com/pythondev958 | LinkedIn: linkedin.com/in/omar-rasheed-4a9858213 | Portfolio: omar-portfolio-xi-nine.vercel.app

PROFESSIONAL SUMMARY

Python Automation Engineer and Backend Developer with 3+ years of professional experience and 5+ years of hands-on project experience in software development, databases, automation, and AI-oriented systems. Skilled in Python, FastAPI, Django, Flask, Celery, Redis, MongoDB, PostgreSQL, SQL Server, Oracle, Selenium, n8n, ETL pipelines, web scraping, and LLM integrations using Ollama, LangChain, and OpenAI APIs. Experienced across requirement gathering, solution design, development, testing, debugging, deployment support, documentation, and maintenance. Also experienced in Hetzner VPS deployment, Docker-based service management, Caddy reverse proxy configuration, domain routing, server log inspection, and production troubleshooting. Serious, client-focused professional with strong communication skills, open to feedback and focused on delivering reliable, maintainable solutions on time.

CORE TECHNICAL SKILLS

Backend Development	Python, FastAPI, Django, Flask, REST APIs, Webhooks, API Integrations, Backend Architecture
AI & LLM Systems	Ollama, LangChain, OpenAI API, Prompt Engineering, Transcript Analysis, NLP Pipelines, AI Workflow Automation
Automation	Selenium, n8n, Web Scraping, Browser Automation, API Polling, Workflow Orchestration
Async Processing	Celery, Redis, Background Workers, Queue Processing, Batch Processing, Job Status Tracking
Databases	PostgreSQL, MongoDB, SQL Server, Oracle, MySQL, Snowflake, Query Optimization, Indexing, Replication
Cloud & Deployment	Docker, Hetzner Cloud, Caddy, Linux VPS, Vercel, GitHub, Reverse Proxy, Deployment Troubleshooting
Tools	VS Code, Postman, Git/GitHub, Toad Data Modeler, Dataedo, SQL Server Agent, Power BI

PROFESSIONAL EXPERIENCE

Freelance Backend, AI & Automation Developer | Remote / Private Clients | Jun 2025 - Present

- Working with freelance and private clients on backend, automation, AI integration, database, and workflow-oriented projects.
- Focused on Python/FastAPI systems, API integrations, audio-call processing concepts, Celery/Redis pipelines, MongoDB data flows, and LLM/Ollama-based transcript analysis.
- Support the complete delivery lifecycle: requirement gathering, solution design, implementation, testing, debugging, deployment support, documentation, and maintenance.

Software Engineer - Backend & Automation | SeQuenX AI | Mar 2025 - May 2025

- Engineered real-time API automation pipelines using FastAPI and webhooks to synchronize eCommerce systems.
- Developed backend logic to sync Webflow eCommerce inventory and orders using Python and FastAPI with error handling and status tracking.

Associate Database Developer | iENGINEERING Pvt. Ltd. | Jun 2024 - Mar 2025

- Developed and maintained Oracle and SQL Server databases for U.S. federal projects including US FHWA, NASA MERRA Tools, BDPT, LTPP InfoPave, and LTBP InfoBridge.
- Executed high-volume data migrations using Oracle Data Pump utilities and maintained scalable data models using Toad Data Modeler and Dataedo.
- Automated PL/SQL and T-SQL scripts to improve performance, reduce redundancy, and support analytical infrastructure standards.

Backend Developer | KINS247 | May 2024

- Developed Django-based backend modules for VoIP billing workflows through CGRates.
- Built RESTful APIs to process real-time call session data and manage billing logic.

Database Developer | Appedology Pvt. Ltd. | Oct 2022 - Mar 2024

- Maintained and optimized SQL Server databases used in U.S.-based healthcare and medical billing systems.
- Implemented SQL Server replication, monitored using Replication Monitor, and scheduled automated jobs using SQL Server Agent.
- Improved query performance with indexing strategies and built Power BI dashboards, improving report generation speed by approximately 30%.

Database Administrator | DataQ Health | Jun 2022 - Jul 2022

- Supported a custom EMR module and data ingestion workflows using Python, optimized SQL, Snowflake and AWS S3 concepts.

Freelancer | Remote | 2021 - 2022

- Built Python/Django-based web applications and database-driven systems for remote clients.

FEATURED PROJECTS

AI-Powered Medical Call Analysis System | Python, LangChain, Ollama, Celery, Redis, SQL |

- Designed and worked on an AI-powered transcript intelligence system using local LLM workflows to extract sentiment, intent, keywords, summaries, and improvement suggestions from support call transcripts.
- Used Celery and Redis for asynchronous processing and improved workflow reliability through logging, debugging, and queue-based processing.

Logistics Load Management Automation System | Selenium, n8n, FastAPI, Xano, Hetzner |

- Built automation workflows for logistics load management using Selenium browser automation, n8n orchestration, backend APIs, and deployment support.
- Automated repetitive operational workflows and improved processing reliability for logistics tasks.

Audio Processing Backend Debug Lab | FastAPI, Celery, Redis, MongoDB, watcher.py, Postman, Ollama |

- Designed a safe local backend demo inspired by production audio-call processing systems: ZIP/audio ingestion, MongoDB job queue, watcher.py runner, Celery/Redis stages, fake transcription, analysis, upload flow, statuses, and Postman testing.
- Planned extensions include domain configs, batch processing, priority queues, two-worker simulation, ZIP extraction, real WAV files, and Ollama transcript summaries.

Realtime Video Object Detection | Python, OpenCV, YOLO, Machine Learning |

- Built a real-time multi-object detection system using YOLO models and OpenCV for live and prerecorded video processing.
- GitHub: github.com/pythondev958/Realtime_Video_Object_Detection

EDUCATION & CERTIFICATIONS

BS Computer Science | Bahria University Islamabad | CGPA: 3.28 / 4.0

Certifications | freeCodeCamp / Udemy |

- Machine Learning with Python - freeCodeCamp: freecodecamp.org/certification/omark786786/machine-learning-with-python-v7
- Complete Guide to Bot Creation - Udemy: udemy.com/certificate/UC-930f2ffc-84a3-40aa-afb9-e41c4892dba2

TARGET ROLES

Python Backend Developer | FastAPI Developer | AI Automation Developer | API Integration Developer | Automation Engineer | Web Scraping Developer | Data/ETL Developer | Database Developer | Celery/Redis Backend Developer
